

Belton Foods

Consistently Delicious

February 4, 2020

Dear Valued Customer,

This letter is in response to your request for an allergen statement for Belton Foods, LLC. The most common food allergens, as identified by the US Food and Drug Administration and the World Health Organization, are wheat, soy, eggs, milk, peanuts (groundnuts), tree nuts (walnuts, pecans, hazelnuts, etc.) fin fish and shellfish. Belton Foods, LLC. products do not contain or use these allergens in processing. These products may contain up to 2 ppm. of sulfur dioxide but this is below the level of concern and labeling requirements established by the US Food and Drug Administration.

Sincerely,

Mike Rogers
Quality Assurance Manager
Belton Foods LLC.
